

Stone Brook Solutions

Transform. Compete. Succeed.

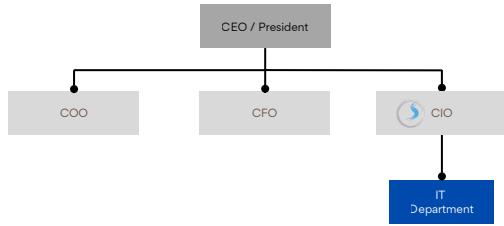

Strategic IT Leadership for Growing Businesses

Who We Are

Stone Brook Solutions provides fractional and virtual IT executive services, project management consulting, and PMO development for small and mid-sized businesses.

We help organizations align technology with business goals, improve operational efficiency, and deliver successful projects—without the overhead of full-time executive hires.

Fractional IT Executive

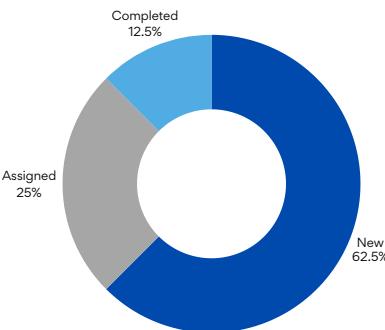

- Executive Guidance & Strategic Planning
- S.T.E.P. (Strategic Technology Executable Plan)
- Executive Visibility & Feedback Loop

Ideal for SMBs needing high-level IT strategy without a full-time CIO

Virtual IT Executive

- Department-level Oversight
- Tactical Project Planning
- Vendor Management & Performance Metrics

Perfect for businesses seeking hands-on IT leadership to optimize operations

PMO and Project Management Services

- Multi-project Portfolio Management
- Steering Committee & Reporting Standards
- Agile, Waterfall and SAFe Methodologies
- On-time, On-budget, High-Quality Delivery

Ideal for businesses needing expert project execution and adaptability

The Ed Block Courage Award Foundation provides each of the 27 members of the National Courage House Network supporting abused, neglected and at-risk youth with monetary and gift-in-kind donations along with various needed services to help advance their mission.

Case Study - 1

Transforming Healthcare Service Delivery through Agile IT Solutions

Client Profile:

A mid-sized healthcare firm with 42 employees faced challenges in managing its IT operations, affecting their service offerings and customer support.

Challenge:

The client's existing IT infrastructure, built on ASP.Net and SQL Server, was unable to quickly adapt to the changing demands of the healthcare market. The development and deployment of new services were slow, and the IT team, feeling overwhelmed and underappreciated, struggled with dated skills and weak project management. The lack of strategic IT direction hindered the company's ability to compete effectively.

Solution:

Our IT consulting firm engaged with the client to overhaul their IT strategy and introduce Agile methodologies, focusing on enhancing the agility and responsiveness of their IT services. We implemented a new project management tool and restructured the IT team to improve workflow and project visibility.

Results:

The adoption of Agile methodologies transformed the client's IT operations, enabling faster development cycles and more frequent product releases that met user needs. The enhanced reporting and simplified workflows led to a 30% increase in customer retention and a significant gain in market share due to new ancillary service offerings. The client's IT team became a strategic asset, directly contributing to the firm's growth and success in the competitive healthcare industry.

Case Study - 2

Revolutionizing IT with Customer-Centric Solutions in Healthcare

Client Profile:

A healthcare company was struggling to keep up with market demands due to an outdated IT system that dictated business operations rather than enabling them.

Challenge:

The client's IT system was built on a complex mix of ASP.Net, SQL Server, and SSRS, which made it difficult to implement changes and address customer needs efficiently. Their business strategy was hampered by IT limitations, leading to missed opportunities and a reputation for poor service.

Solution:

Our team conducted a thorough assessment of the existing IT infrastructure and business processes, implementing a customized solution that focused on agility, customer service, and market responsiveness. We revamped their software architecture using cloud services and a shared responsibility and shared security model to enhance decision-making and service personalization.

Results:

With the new system, the client was able to offer "white glove" service to key customers and rapidly adjust pricing structures to reflect market conditions, resulting in enhanced customer satisfaction and loyalty. The streamlined processes and advanced reporting capabilities enabled the client to anticipate market needs and launch new services effectively, leading to a robust increase in market share and overall business growth.

Case Study - 3

Strategic IT Overhaul Leads to Enhanced Market Performance in Healthcare

Client Profile:

A specialist in healthcare with significant challenges in IT governance and strategy, hindering their ability to expand and innovate.

Challenge:

The client was constrained by an IT department structure that was flat and non-strategic, leading to prolonged product development cycles and inadequate market responses. The business felt hostage to its IT department, which lacked direction and modern IT skills.

Solution:

We introduced a comprehensive IT strategy overhaul, starting with leadership coaching for the CIO to transition from lead developer to strategic leader. We redefined the IT department's structure to foster a collaborative environment focused on business goals and customer needs, utilizing modern tools and technologies to streamline operations and enhance data management.

Results:

The restructuring led to a revitalized IT department that was able to deliver new functionalities within weeks instead of months. The business experienced a significant turnaround, with increased agility in service offerings and a more robust presence in the healthcare market. The new strategic approach not only improved internal morale but also positioned the client as a forward-thinking leader in healthcare services.

Testimonials

Jim Frances **Director, SC&H Group - fmr**

Richard is someone that knows how to work in a collaborative manner, strives to make sure all parties are satisfied with the project, and that any project he is involved with is completed in a timely manner. During my 30-year career I worked with many IT professionals but Richard stood out from the crowd. He had the rare skill set of being a strong project manager / IT expert as well as working to ensure the needs of our business were met.

Frank Scaramuzza **Senior Portfolio Manager, Ingredion Inc. - fmr**

While working for a global food distributor, I had the pleasure to work with Richard while I was overseeing an acquisition of a mid-sized spice manufacturer. During this acquisition, it was imperative to integrate legacy systems of the smaller firm into our organization in an expeditious and efficient manner while mitigating the risk related to customers and their orders.

Richard provided the leadership and expertise that accomplished both objectives. He was instrumental in organizing and leading efforts to prepare the legacy systems for conversion, implementing new solutions that were compatible with our organization, and managing those efforts to avoid any outages on the production lines and shipping. Richard's skills and knowledge of technology are only matched by his people skills and abilities to lead them toward the common business goal.

Testimonials - cont.

Kress Stein
CEO Efferent Health

Working with Stone Brook Solutions has been nothing short of professional and competent. The knowledge and leadership we experienced during the course of a 14 month project has been proven invaluable to the outcome of the project. Stone Brook Solutions brokered many collaborative interactions during the project with the focus on a compatible solution that would benefit all parties. We look forward to future projects with Stone Brook Solutions.
